## DETAILED ACTION

### *Examiner's Amendment*

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeffrey Maynard on 11/21/2012.

The application has been amended as follows:

**Claim 49 – Line 1 – after “having a” and before “computer readable”, insert “non-transitory”.**

### *Allowable Subject Matter*

2. Claims 1, 2, 4, 5, 7, 15, 16, 18, 19, 22-27, 30, 31, 33-35, 49-54, 57, 59-62, 64, 66, 67, 69, and 70 are allowed.

The following is an examiner's statement of reasons for allowance: The independent claims of Applicant's invention recite determining if selected e-coupons complies with redeeming conditions, determining mutually exclusive e-coupons applicable within a purchase and whether two or more of those coupons can be used in combination, determining optimization parameters, optimizing a discount amount, a number of loyalty points, and a number of free items by

Art Unit: 3622

determining a most favorable combination of non-mutually exclusive e-coupons, displaying the most favorable e-coupons to a user before a purchase is made, saving the displayed combination of e-coupons, choosing a saved set of e-coupons based on comparing multiple saved sets of e-coupons, and recommending additional e-coupons in relation to a purchase.

Fajkowski (U.S. Patent No. 6,932,270) teaches systems and methods for storing electronic coupons, associating them with customers, presenting them at a retail POS and redeeming them. A user is provided with a card which provides a userID. The card is used to associate selected coupons from a plurality of available coupons from different sources (by scanning paper coupons, by selecting coupons at a kiosk or by downloading coupons from the Internet) with the user's account in a database. When the card is presented at the POS along with scanned products to be purchased (i.e. before the purchase is completed by way of accepting payment - and therefore, "before purchase"), the POS system determines what coupons of the user's collection of selected coupons are redeemable given the user's scanned products; the system displays these coupons on the display. Fajkowski teaches that the coupon eligibility parameters (product name, required size, quantity or combination of items required, expiration) may be stored on the card in order to determine Fajkowski's system accomplishes the automated eligibility determination in the manner of an Expert System (a computer system programmed to replace a human clerk having the knowledge to determine eligibility for the universe of participating coupons and

Art Unit: 3622

their restrictions/parameters). Fajkowski's system is also quite intelligent in that it can recommend an additional purchase when a consumer possesses a valuable coupon, but has not fully met the purchasing qualifications (perhaps the user chose the wrong size product). This is another example of an Expert System capability. Fajkowski teaches that the user may save shopping lists with specified coupons for the products on the list to be used on future shopping trips. Fajkowski also teaches the idea of issuing a rain check for a coupon item the user wishes to purchase, but where the item is currently unavailable. The system will save such a list of rain-checked product(s) for later use. Further, the art describes the capability to save any number of coupons which enables saving combinations of coupons. Further still, Fajkowski's also teaches that the system can recommend an additional purchase when a consumer possesses a valuable coupon, but has not fully met the purchasing qualifications (perhaps the user chose the wrong size product). However, according to the Board decision rendered 9/19/2012, Fajkowski does not teach comparing the rainchecks as a separate subset to another subset of mutually non-exclusive coupons. Therefore, the above claims are hereby allowed. See the Board decision mailed 9/19/2012.

Based on the Board Decision rendered 9/19/2012, no 101 issues were brought to light by the board, and therefore no 101 issues are present in the claims. However, claim 1 is a method claim with multiple significant steps being performed by a computer which overcomes 101. After the Examiner's

Art Unit: 3622

Amendment above, Claim 49 recites a non-transitory computer readable medium, which overcomes 101. Claim 62 recites a system comprising a hardware module, which is structural and overcomes 101.

. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
